

*"World's finest, safest garage doors."*TM Since 1936

MARTIN DOOR QUALITY

Superior Steel

We use 23-gauge high-tensile steel, which is stronger and harder to dent than industry standard steel. The steel is hot-dip galvanized with two layers of baked-on enamel paint for the longest life in the industry.

Superior Springs

We use high-cycle galvanized springs that can last 20% to 66% longer and are cleaner than industry standard oil-tempered springs.

Superior Hardware

Martin hardware is tested to 100,000 cycles. We offer long-life features not offered by most manufacturers, including 10-gauge low-profile hinges, 1/8" thick steel cables, commercial-grade reverse angle, and roller brackets.

Superior Safety

Most Martin doors come with standard safety features not offered by other manufacturers, including pinch-proof joints, lock-on bottom bracket, concealed lift cables, and no sharp edges.

MARTIN DOOR LEAD TIMES

We offer the industry's fastest lead times.

MARTIN DOOR UNIQUE DESIGNS

We offer materials, designs, and colors that are as individual as your customer. From aluminum and steel carriage house doors, to smooth finish, or symmetrical raised-panel stamps on all door widths.

MARTIN DOOR LIMITED LIFETIME WARRANTY

We offer a Limited Lifetime Warranty on all doors, springs, and hardware - except Standard Doors and Standard Hardware.

MARTIN DOOR SERVICE

Our service team is second to none in responding to your questions and orders.

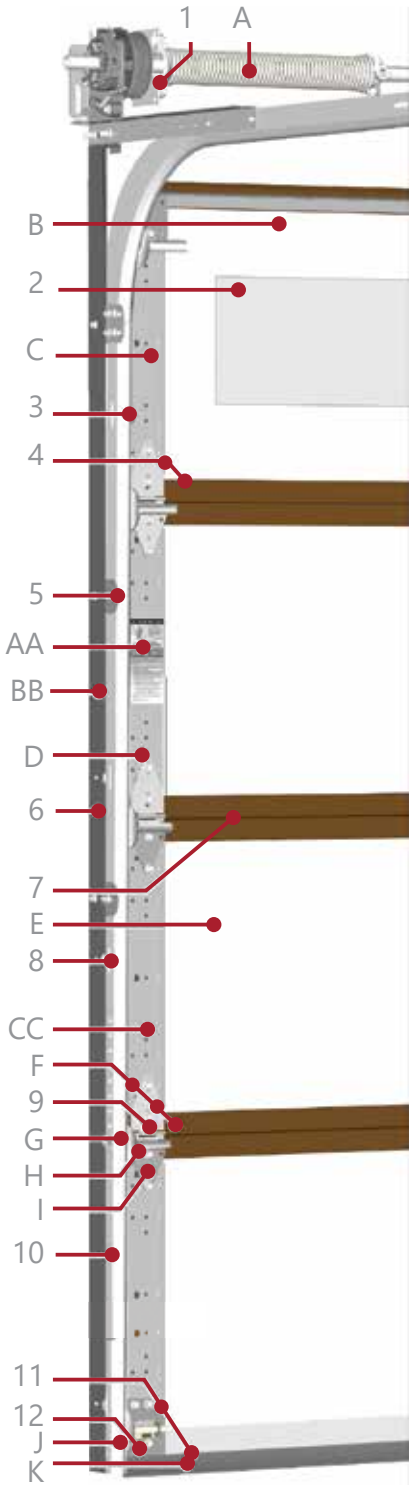

MARTIN DOOR INTANGIBLES

We do things differently to give you and your customers the greatest experience in ordering, producing, and delivering a custom and quality garage door - making the customer's home or business original and beautiful.

How do other garage doors compare to Martin?

These upgrades are included on most Martin garage doors, but are usually an up-charge or not included at all on doors manufactured by other companies.
